

Comprehensive Care. Specialized Therapies.

At an **inpatient rehabilitation hospital or unit**, patients benefit from a highly coordinated, team approach to care led by a **physiatrist**, a board certified doctor in physical medicine and rehabilitation.

Treatment is tailored to **each patient's individual needs** and rehabilitation goals.

Speech
Therapy

Strengthens **speech, language, swallowing** and **communication skills**

Cognitive
Therapy

Improves **memory** and **reasoning**

Respiratory
Therapy

Treats **breathing disorders** and **respiratory distress**

Recreational
Therapy

Maintains the **physical, mental and emotional well-being** of patients

Physical
Therapy

Improves **strength, balance** and **mobility**

Occupational
Therapy

Helps restore **fine motor skills, coordination** and **functional abilities**
